

Broadcast FM Transmitter mod. ESVA

- Compact 1HE professional case with reduced dimensions and weight
- Lower AC power consumption and Lower heating
- Top sound quality due to an FM signal generator having excellent signal/noise ratio and ultralow THD
- Full Broad band. No tuning or adjustments required. The frequency can be easily changed in whole FM band
- Dynamic protection of the power output which is automatically reduced to keep your station on the air
- Wide operating voltage range: 100-240V AC
- Easy and intuitive way to change frequency under a password key
- Simple installation and setup

Mod with stereocoder option
